Our Mission

- To maintain ANC airfield surfaces in a safe condition
- To ensure our procedures are efficient and effective
- To always be prepared for changing conditions and ready to deal with them appropriately
- To provide accurate and timely information on actual surface conditions

Our Team

- 109 Dedicated Professional Men and Women
- Five Time Large Hub Balchen Post Award Recipient
- 3-6 million tons of snow moved annually
- The Airport has not closed due to snow or ice events in the last 30 years

Typical Formation

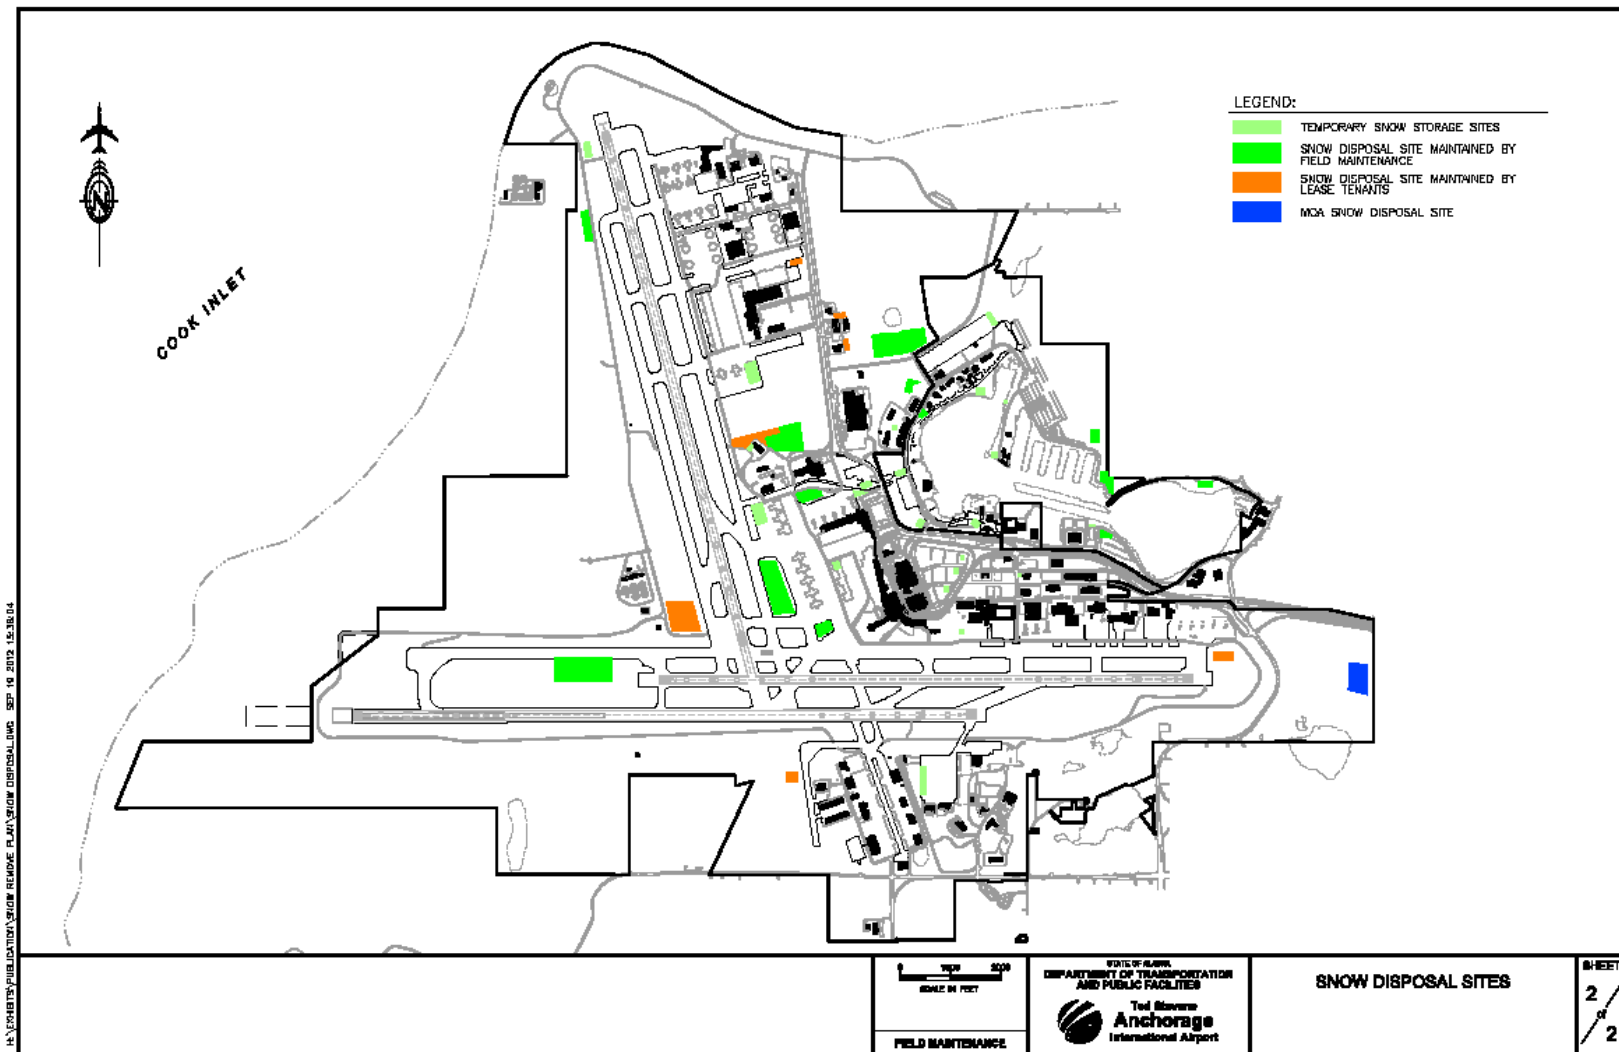

Key Elements To Success

- Staying ahead of the conditions
- Keeping the snow removal equipment moving
- Communication
- Flexibility
- The right tools to get the job done
- Collaboration with stakeholders

Snow Storage

Snow Disposal Sites

Snow Storage

- Snow must be stored on leaseholds or in authorized snow dumps
- Snow should be free of trash and debris
- Permits are required
- Terminal apron procedures

Additional Resources

Airport Operations

- NOTAM's and Data Dissemination
- Winter Operations
- 266-2600

Environmental

- Reporting Procedures
- 266-2467

Airside Parking Lot Closure Schedule

Snow and Ice Control Plan 2014/2015 Winter Season
